About ISBE

Founded in 2019, the Institute for Evidence-Based Health (ISBE) is a private independent non-profit umbrella organization that bridges Academia, Individual Researchers and Partners and is dedicated to the purpose of synthesizing, generating, disseminating and translating into practice the most relevant and high-quality scientific knowledge in Health.

Mission & Vision

The mission of ISBE is to advance knowledge by inspiring and fostering collaborative evidence-based health research that informs healthcare policies and practice and transforms healthcare.

ISBE will work to investigate new ways of improving patients' quality-of-life by informing health decisions of patients, healthcare providers, healthcare organizations, and health systems.

Our vision goes beyond the now. Our main goal is to make ISBE nationally and internationally recognized as a leader in transforming the healthcare system.

OUR VALUES

COLLABORATION

Collaboration between researchers, healthcare professionals, policy makers and consumers/patients as an essential step for delivering useful healthcare solutions to society.

INNOVATION

Innovation as the key to breakthrough thinking that leads to significant systems improvements.

EVIDENCE-BASED

Development and use of the best available evidence as the basis for all actions.

SCIENTIFIC AND RESEARCH EXCELLENCE

Striving to deliver results with exceptional quality and value.

VALUE-BASED HEALTH CARE

Outcomes to advance efficiencies and improvements that make a difference in healthcare delivery at affordable and fair costs.

HEALTHCARE PROVIDERS' ROLE

Develop evidence supporting the essential roles of pharmacists, physicians, and other healthcare providers in the delivery of appropriate, effective and safe healthcare.

EDUCATION AND TRAINING

Developing education and skill building as a core task.

Core Principles

Our work is underpinned by a core set of principles that guide our mission:

Intellectual Independence

Strong Academic Component

Federation of Multiple Entities

International Visibility

Financial sustainability

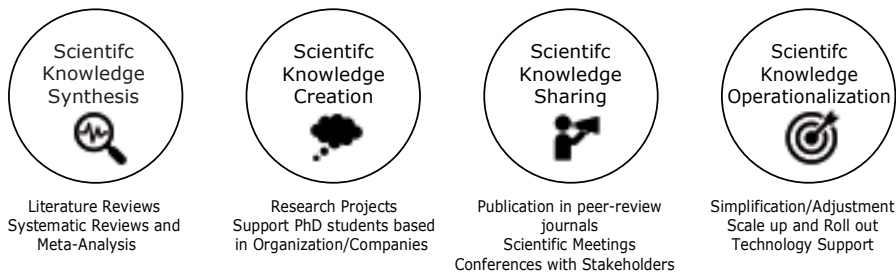

Research Areas

ISBE devotes its values and knowledge to the main research areas:

- 1.** Epidemiology, Big Data & Real-World Evidence (RWE)
- 2.** Health Outcomes Research (HOR) & Health Services Research (HSR)
- 3.** Artificial Intelligence in Health
- 4.** Public Health & Public Policies
- 5.** Health Technology Assessment (HTA)
- 6.** Knowledge Translation

Goals

We will pursue four major goals for each research area:

Key Performance Indicators (KPIs)

Our KPIs intend to assess our impact on: Academy, Science, Society and Operational Visibility.

Impact on Academy

E.g. Number of PhD students/Doctors and Masters

Impact on Science

E.g. Number of articles published in magazines with a high JIF

ISBE

Operational Visibility

E.g. Financial sustainability in the medium term

Impact on Society

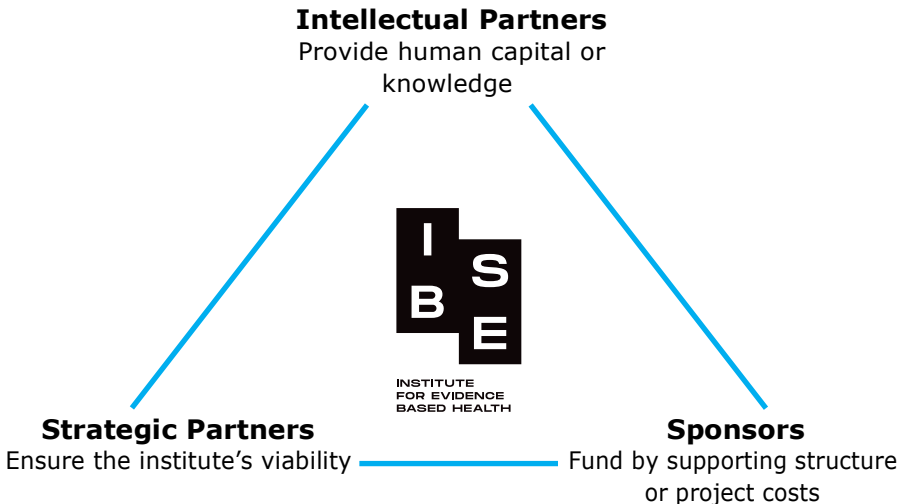

E.g. Number of health care interventions implemented

Why partner with ISBE?

ISBE bridges Academia, Individual Researchers, Healthcare and Patient Organizations around six research areas key to the healthcare system.

By partnering with ISBE, organizations with an interest in health research agenda can leverage the impact of best possible outcomes at affordable costs on society.

We welcome strategic partners, intellectual partners and sponsors interested in advancing knowledge and transforming healthcare with us.
